MEMOIRS

OF THE

COLLEGE OF SCIENCE

KYOTO IMPERIAL UNIVERSITY

SERIES A

VOL. XV.

1932

KYOTO

CONTENTS OF VOLUME XV

PAGE

Usaburo Yoshida and **Bunsuke Takei**—Net Density of Ramie-Cellulose 1

Hideki Hirata and **Yoshio Tanaka**—On the Arrangements of the Micro-crystals in Copper and Gold deposited by Electrolysis 9

Yoshio Fukami—The Arrangement of the Micro-crystals in compressed Single-Crystal Plates of Aluminium, Part IV . . 23

Takeo Fujiwara—The Arrangement of the Micro-crystals in the Film of Molybdenum obtained by Deposition 31

Takeo Fujiwara—Effects of the Direction of Drawing on the Arrangement of the Micro-crystals in Aluminium Wire and on its Tensile Strength and Broken Fracture 35

Masao Sawada—On the Origin of the X-Ray Non-Diagram Lines in the *K* Series 43

Shigeru Komatsu and **Shinsaku Ozawa**—Biochemical Study on the Autumn Fall of the Leaf 57

Yoshito Yamauchi—The Diffusion of Zinc in Copper and its Alloys 67

Shūjiro Kunii—On the Solutions of the Cosmological Field Equations and Some Models of the Universe with Annihilation of Matter 97

Toshima Araki et **Kiyoshi Yamamura**—Sur les Conditions Thermiques d'un Météorite s'approchant du Soleil d'après la Loi de la Gravitation 113

Takaharu Nomitsu—Note on Dr. Rosenhead's Papers, "The Annual Variation of Latitude" and "Tides on a Two-layer Earth" 123

Takaharu Nomitsu and **Tohichiro Takegami**—On the Convection Current and the Surface Level of a Two-layer Ocean . . 131

Motooki Matsui, Tetsunosuke Sawamura and **Teruzo Adachi**—Electrolytic Reduction of Saccharin. Part I. Electrolysis in Acid and Alkaline Solutions 151

Yoshikazu Toyohara—On the Tides and Seiches of Osaki-Bay . 157

Chujiro Matano—Influence of Temperature upon the Diffusion Velocity of Solid Metals (The Zinc-Copper System) . . 167

PAGE

Motooki Matsui and **Gisho Sakurada**—On the Splitting of the Sulphonic Group from the Aromatic Ring by Electrolytic Reduction 181

Motooki Matsui and **Shingo Arakawa**—Electrolysis of a Mixture of Two Fatty Acids 189

Jun'ichi Tomita—On Binomial Distribution 195

Kiugoro Kitagawa—Théorie de l'Écoulement des Eaux Souterraines 203

Takaharu Nomitsu and **Munetosi Namba**—On the Distribution of Bombs from a Volcanic Vent 215

Hiroshi Okamura—Recherches sur le Degré de Grandeur d'une Certaine Intégrale Définie contenant un Paramètre; leurs Applications aux Séries Entières et à l'Équation Différentielle Ordinaire 235

Akira Kobori—Über sternige und konvexe Abbildung 267

Akira Kobori—Über die notwendige und hinreichende Bedingung dafür, dass eine Potenzreihe einen Kreisbereich auf den schlichten konvexen oder sternigen Bereich abbildet . . 279

Matakichi Ishino and **Kohei Kojima**—K-Absorption Edges of Ni, Cu, Zn and their Compounds 293

Hisashi Kiyota—Electrolytic Deposition of Zinc from Acid Solutions 301

Ichiro Aoki—Experimental Studies on the Sound of a Japanese Temple-Bell ("Ōjikichō" in Myōshinji-Temple) 311

Keiji Yamashita—A Theory of the Vibration of Japanese Hanging Bells 315

Keiji Yamashita and **Ichiro Aoki**—On the Frequencies of the Sound emitted by Japanese Hanging Bells 323

Kiugoro Kitagawa—Sur la Propagation des Ondes de Dilatation dans la Mer 327

Shigeru Komatsu and **Yoshiharu Ogata**—On the Chemistry of Japanese Plants X. Utilisation of Plant Ash in Chemical Industries I 341

Chujiro Matano—X-Ray Studies on the Diffusion of Copper into Nickel 351

Arata Iwamura—Quantitative Spectrum Analysis. Part V. Determination of Rubidium Chloride contained in an Artificial Carnallite 355

Arata Iwamura—Quantitative Spectrum Analysis. Part VI. An Attempt to determine the Amount of Gold contained in Natural Ores 359

PAGE

Arata Iwamura—Quantitative Spectrum Analysis. Part VII. Determination of the Ratio of the Concentrations of Gold and Silver contained in a Sample 365

Arata Iwamura—Quantitative Spectrum Analysis. Part VIII. Determination of Each Salt in a Mixture of Two Salts with the Same Anion or a Two Oxide Mixture of Different Elements contained in a Sample by the Spectrographical Determination of the Ratio of the Concentrations of the Two Elements in Question 371
